LIVE VISIBILITY Track active fleet & shipments	SMART DISPATCH Coordinate drivers & loads	DIGITAL OPERATIONS Billing, POD & reporting
--	---	---

PRODUCT PRESENTATION

01 | Executive Overview

Logitruck is a production-ready logistics software solution designed to connect transport providers, businesses, drivers, and customers through a unified digital ecosystem. It focuses on operational efficiency, real-time visibility, scalable fleet management, and streamlined financial workflows.

BUSINESS VALUE Reduce operational bottlenecks, manual coordination, and paperwork while improving delivery visibility.	WHO IT SERVES Fleet owners, dispatchers, logistics companies, businesses, drivers, and end customers.
--	---

02 | Web Portal

A centralized control center for fleet owners, dispatchers, and system administrators.

- **Automated Order Dispatching** Assign loads based on driver proximity, vehicle capacity, and availability.
- **Billing & Invoice Generation** Automate freight charges, tolls, and client invoicing.
- **Driver & Vehicle Management** Maintain profiles, license expiration alerts, and maintenance logs.
- **Advanced Analytics & Reports** Monitor fuel efficiency, delivery turnaround times, and revenue growth.

03 | Android App

A field-ready companion for drivers and customers, enabling seamless communication between the road and the operations desk.

- **Real-Time Status Updates** Instant notifications for pickup, transit milestones, and proof of delivery.
- **Digital Proof of Delivery** Capture e-signatures, recipient details, and package-condition photos.
- **Trip & Expense Logging** Record fuel purchases, toll expenses, and maintenance notes instantly.

04 | Investment Plans

Flexible deployment options to match different business models and scaling strategies.

Package	Included Deliverables	Best For	Price
Web Portal	Admin & dispatch dashboard, database setup, source code, deployment support.	Logistics companies focused on desktop-based management and dispatching.	₹15,000
Android App Only	Native driver/customer app, APK + source code, integrated core backend APIs.	Mobile-first dispatching or on-demand delivery startups.	₹15,000
Web + App Combo	Full web portal + Android app, integrated real-time database and cross-platform synchronization.	Enterprises seeking a turnkey end-to-end logistics platform.	₹25,000 • BEST VALUE

05 | Technology & Reliability

Frontend / Web	Modern responsive web framework optimized for high-speed performance across browsers.
Mobile	Modern cross-platform capabilities designed for high performance on Android hardware.

Backend & Database

Secure, scalable, cloud-ready architecture with high availability and encrypted data transit.

Security

Role-based access control (RBAC) and encrypted user credentials to protect sensitive corporate data.

06 | Why Logitruck?

- ✓ One connected ecosystem for web and mobile operations
- ✓ Real-time fleet and shipment visibility
- ✓ Digital dispatching, billing and proof of delivery
- ✓ Scalable architecture for growing logistics businesses
- ✓ Source-code options for flexible deployment and ownership

07 | Ready to Scale Your Logistics Business?

Deploy Logitruck to streamline operations, reduce manual paperwork, improve coordination, and elevate customer satisfaction. Schedule a live walkthrough or request source-code handoff details.
